Control Stack

Price per Unit (piece): \$250.00

Fiddly wiring is a thing of the past with the CNC Control Stack, it will save you a lot of time and frustration. This neat and compact system allows easy plug-in connection for external devices and is configured so it can be mounted within an enclosure allowing you to expose all of the plug sockets for safe external connection. The Stack System also interfaces directly with the TEKdrives to give you neat and tidy internal wiring.

Features include:

- Mach 3 Parallel Port
- 4 Relay Outputs Mist, Flood, CW, and CCW
- 4 Homing Switch Inputs
- 1 E/Stop Input
- Digitizing Probe Input
- PWM Output
- LED Relay Indicator Board
- Relay Off Switch for Dry Run
- Interfaces directly with our TEKdrives
- Runs smoothly on any system that can comfortably run Windows
- PWM Output for Spindle Speed Control
- Digitizing Probe Input
- Requires 12Vdc external power supply and enclosure
