Parallel Interface Breakout Board

Price per Unit (piece): \$150.00

This board has been specifically designed to allow Plug & Play compatibility for our TEK™KDrives and Mach3 Software (DB25 version). Features include:

- Digital Charge Pump option for Mach 3.
- Drive enable/disable circuitry.
- Automatic E/Stop and drive disable on any drive fault condition.
- External E/Stop on 12V circuit with Relay operation
- Fully buffered I/O from PC, drives and I/O.
- Each drive connects via a 10 way ribbon cable plug/socket. No messy screw terminals!
- Runs from a single 12V supply
- Compatible with our standard Relay and Home Input boards to form a control stack.
- Allows for serial tuning when used in conjunction with our TEK6 drives.
